SUMMARY

- Chief Information Systems Technician with 17+ years in IT, systems management, cybersecurity, and leadership. Proven ability to modernize IT curricula, manage critical infrastructure, and lead high-performing technical teams. Dual B.S. in Computer Science and Cybersecurity. Transitioning to civilian sector roles in IT, cyber, or software engineering while preparing for graduate-level research.

EDUCATION

- **University of Texas at Austin** Austin, TX
M.S. in Computer Science Aug. 2025 - Present
- **Sonoma State University** Rohnert Park, CA
B.S. in Computer Science; Cum Laude; CS Club President Aug. 2023 – May 2025
- **Southern New Hampshire University** Nashua, NH
B.S. in Cybersecurity, Minor in Applied Mathematics; Summa Cum Laude Aug. 2019 – May 2025
- **Santa Rosa Junior College** Santa Rosa, CA
A.A. Coursework in Computer Science Jun. 2020 – Aug. 2023

RESEARCH

- For a senior research project at Sonoma State University, I developed a research poster evaluating the concrete security of the NIST-standardized CRYSTALS-Kyber KEM. Compared the cost of primal, dual, and side-channel-assisted attacks, and analyzed how reduction tightness impacts real-world key length recommendations under quantum threat models. Built and interpreted an attack tree to identify the most practical adversarial strategies, highlighting where physical side-channel vectors could reduce attack cost.

TECHNICAL SKILLS

Languages: C/C++, Python, Java, SQL, Lua, C#

Tools: Git, Wireshark, Splunk, Docker, PowerShell, VxWorks, Cisco IOS

PROJECTS

- **"Make" Simulator:** Built in C++, simulates dependency resolution like 'make'. Utilized file timestamps and recursive graph traversal to avoid unnecessary recompilation.
- **C/C++ (Like) Interpreter:** Designed and implemented a recursive descent parser and AST interpreter for a C-like language. Handled symbol table management, control flow, and postfix expression evaluation.
- **Spanning Tree Maze Generator:** Developed a maze visualizer using Kruskal's algorithm and DFS for path solving. Output to terminal-based display.

EXPERIENCE

- **U.S. Coast Guard, Training Center Petaluma** Petaluma, CA
IT Curriculum Manager (Curriculum Chief) Jun. 2022 – Jul. 2023
 - **Curriculum Modernization:** Managed and maintained national apprentice-level IT training curriculum. Piloted an AGILE model to reduce training time by 25%.
 - **Instructor Development:** Mentored IT instructors and led professional development workshops on teaching strategies.
 - **Content Revamp:** Updated over 40 course objectives to align with ACE and CompTIA standards. Integrated crosswalk analysis for prior-experience candidates.
 - **Process Innovation:** Implemented feedback loops and iterative review processes to accelerate curriculum evolution.

EXPERIENCE (CONTINUED)

- **U.S. Coast Guard, Training Center Petaluma** Petaluma, CA
Lead IT Instructor *Jun. 2018 – Jul. 2022*
 - **Hands-On Training:** Instructed 100+ students per year on enterprise/VOIP systems, including analog/digital switches and advanced trunking protocols.
 - **Course Material Design:** Created and revised training materials to accommodate multiple learning styles across varied experience levels.
 - **Student Mentorship:** Mentored over 30 students annually through academic, technical, and career development.
 - **Peer Collaboration:** Worked cross-functionally with instructors to align assessment practices and lab implementation.
- **U.S. Coast Guard** Petaluma, CA
Information Systems Manager *Jun. 2016 – Jun. 2018*
 - **Infrastructure Maintenance:** Managed 90+ student workstations across two labs; ensured all systems were operational and aligned with training goals.
 - **Print and Presentation Support:** Developed instructional media including large-format posters, diagrams, and visual aids to enhance classroom instruction.
 - **Hardware Lifecycle Oversight:** Coordinated lifecycle upgrades and procurement for lab technology assets.
- **U.S. Coast Guard, Cutter Hickory** Homer, AK
Information Technician Manager *Oct. 2014 – Jun. 2016*
 - **Full-Scope IT Management:** Supported 50+ users aboard a 225-ft cutter; maintained servers, routers, switches, and VOIP systems.
 - **Survey Technology:** Configured laptops to process under-hull sonar data and produce 3D maps for NOAA navigation.
 - **Network Availability:** Managed and secured 25+ workstations and multiple printers within strict operational uptime requirements.
- **U.S. Coast Guard, ESD San Diego** San Diego, CA
Information Systems Technician *Jul. 2013 – Oct. 2014*
 - **Network Installations:** Installed CAT5E cabling and configured racks with Cisco switches and Avaya VOIP systems during facility transition.
 - **Server Maintenance:** Maintained dozens of Dell servers, Cisco switches, and Nortel phone infrastructure.
 - **User Support:** Provided desktop and helpdesk support to 100+ users across server access, printing, and connectivity.
- **U.S. Coast Guard, Patrol Forces SWA** Manama, Bahrain
IT Support Technician *Jun. 2012 – Jul. 2013*
 - **Deployed IT Support:** Serviced 150 users across 6 ships and a land-based support unit with limited resources in harsh environments.
 - **Mission Continuity:** Maintained 8 Dell servers and over 60 client devices with near-zero downtime under combat logistics constraints.
 - **Critical Repairs:** Frequently flew to Kuwait to repair satellite and navigation system failures on high-priority vessels.
- **U.S. Coast Guard, Cutter SPAR** Kodiak, AK
Junior IT Technician *Sep. 2009 – Jul. 2012*
 - **Network Engineering:** Sole admin for shipboard network: Dell servers, 3Comm fiber switches, Cisco routers, and 20+ workstations.
 - **Secure Communications:** Maintained classified systems and shipboard PBX during deployments in the Bering Sea and Gulf of Alaska.
 - **Cross-Training:** Developed secondary expertise in radio systems and bridge equipment, enhancing reliability in extreme conditions.
